BUILDING MAINTENANCE

- 1) Master plan of the building: According to the approved layout plan, building plan and floor plan college building is constructed and proper document is maintained
- 2) Floor maintenance: For the maintenance of each floor in the building housekeeping are appointed and their duty is to clean the respective floors class rooms, wash rooms etc. and to maintain their respective floors clean and neat. The maintenance of the floor is inspected by the supervisors. Details of housekeeping and their attendance is maintained.
- 3) Water Supply: Taking into consideration the universal water scarcity problem; the college has satisfactory water facility. Besides, the college is giving due attention to supply clean drinking water to students by installing a number of aqua guard systems in teaching Departments and hostels. Presently, about 15 more such systems are being installed at various places in our college.
- 4) Water quality analysis : water analysis is done every year by collecting water sample from the college and analysis is done by sneha test house and Hindustan analytical test laboratory and result are found that the sample meets to permissible limits as per **IS 10500:2012**. **Test certificate** is maintained.
- 5) Solid waste disposal :waste is collected from each floor of the college on a daily basis and segregated. Also solid waste disposal plant has been proposed as part of R&D .

- 6) Fire safety : Fire safety norms is being strictly followed in the college premises. an **ISO 9001:2008** certified dry chemical powder fire extinguisher of type A is placed at different important places in the college.
- 7) Landscaping: Landscaping refers to any activity that modifies the visible features of an area of land, including: living elements, such as flora or fauna; or what is commonly called gardening, the art and craft of growing plants with a goal of creating a beautiful environment within the landscape in our college. Presently in our college different types of flowering plants such as hibiscus, *Aster x frikartii*, Catmint, Euphorbia characias wulfenii etc and also different types of shrubs and trees exist.

OUTCOMES

The maintenance of the campus is done on a regular basis according to the standard process and documents have been maintained.

More emphasis has been given for increasing green cover and lung spaces in the campus and ecofriendly measures have been incorporated.
